EDUCATION

Year	Degree/Exam	Institute/Board	CGPA/Percent
2027	B.Tech. Electrical Engineering	National Institute of Technology Manipur	7.48/10
2027	BS	Indian Institute of Technology Madras	6.50/10

SKILLS AND EXPERTISE

Languages and Tools: C++ | Python | JavaScript | HTML | CSS | SQL | Git | GitHub | LTspice | Arduino | MATLAB
Libraries and Frameworks: Flask | Vue | Node | FastAPI | NumPy | Pandas | Scikit-learn | XGBoost | Redis |Celery
Databases and Platforms: PostgreSQL | MongoDB | SQLite | Google Cloud APIs | Kaggle | Jupyter | VS Code
Concepts and Systems: Data Structures and Algorithms | DBMS | OOPs | Operating System | REST APIs | ML
Electrical & Embedded Systems: Circuit Design| Microcontrollers | Sensors & Actuators| Signal Processing | Power Systems Basic

PROJECTS

LLM Code Deployment – Automated App Builder & Evaluator | GitHub **[Oct'25 – Nov'25]**
LLM Automation | Flask | Docker | GitHub API
- Designed an **LLM-powered system** to automatically build, deploy, and evaluate student web applications via GitHub Pages.
- Implemented **secure JSON-based request handling**, CI/CD automation pipelines, and evaluation notification APIs.
- Integrated **Flask, Docker, and GitHub APIs** for autonomous deployment and LLM-assisted code generation.
- Enabled scalable, hands-free application validation for educational use case.

LLM Quiz Solver – Autonomous Multi-Step Agent | GitHub **[Nov'25 – Dec'25]**
FastAPI | LangGraph | Gemini 2.5 | Playwright | Docker | Python
- Developed a **fully autonomous LLM-powered agent** to solve IIT Madras TDS multi-step evaluation quizzes by scraping, reasoning, computing, and submitting answers end-to-end.
- Designed a **LangGraph-based decision workflow** enabling intelligent tool selection, retry handling, and adaptive navigation across chained quiz URLs.
- Integrated **Google Gemini 2.5 Flash** for instruction understanding, multi-step planning, and response analysis based on evaluator feedback.
- Implemented **Playwright-based scraping and dynamic data processing** to handle JS-heavy pages, structured files, and complex numerical tasks.
- Deployed a **Dockerized FastAPI backend** with background execution, achieving high reliability across varied quiz difficulty levels.

Quiz App – Full Stack Web Application | GitHub **[Jan'25 – Apr'25]**
Flask | HTML | CSS | Bootstrap | SQLite | JavaScript
- Built a **full-stack quiz platform** with secure authentication, subject-wise quizzes, timer-based questions, and real-time score evaluation.
- Developed a **role-based admin dashboard** to manage subjects, chapters, quizzes, and questions using complete CRUD operations.
- Designed a **normalized SQLite database** with analytics dashboards (Chart.js) to track user attempts, scores, and performance summaries

INTERNSHIP EXPERIENCE

InventX 2025 Innovation Internship Indian Institute of Technology Jammu – Maker Bhavan Foundation (USA)
Innovation Intern | Jun 2025 – Jul 2025
Domain: Healthcare
Project: Volume-Controlled Oxygen–Air Blender for Neonatal CPAP

- Designed and prototyped a **low-cost oxygen–air blending device** to improve neonatal respiratory care in low-resource hospitals.
- Conducted **clinical field visits** (e.g., GMC Jammu) to gather real-world requirements and validate designs with pediatricians and NICU staff.
- Built a functional prototype emphasizing **patient safety, usability, and manufacturability**.
- Collaborated with a **multidisciplinary team** (Electrical, Mechanical, Instrumentation) to design system architecture and oxygen control mechanisms.
- **Filed a provisional patent**, demonstrating technical novelty and social impact.

COURSEWORK INFORMATION

Programming and Data Structures Python | Algorithms | Database Management Systems | Modern Application Development I & II | Machine Learning Foundations | Machine Learning Techniques | Machine Learning Practice | Power System | Control System | Microprocessor | Power Electronics | Electrical Circuit | Communication System | Digital and Analog Electronics
